Propafilm™ FFC

Technical Data Sheet

FFC - Fast Seal Coated Film.

Biaxially oriented polypropylene (BOPP) film with a fast seal coating on one side and an aqueous acrylic coating on the other side.

Features

- · Exceptionally wide seal range on fast seal side
- · Excellent seal properties in terms of strength, hot tack and integrity
- · Totally forgiving on horizontal flow-wrap machines
- Fast sealing seals remain unaffected by changes in climatic conditions
- · Good aroma and moisture barrier
- Good optical properties
- Excellent printability on acrylic side
- · No seal compatibility between fast seal and acrylic coatings

Applications

FFC25(100)/30(120) are suitable for use as single films or in laminate structures for form-fill-seal packaging especially in the bakery, biscuit and confectionery industries, requiring strong seals and excellent seal integrity.

All properties are tested under standard laboratory conditions: $23 \pm 2^{\circ}$ C, $50 \pm 5\%$ RH, $(73 \pm 4F, 50 \pm 5\%$ RH), unless otherwise stated. Where relevant, tests are based on international testing standards.

Fast Seal Surface

The fast seal surface is available on either the inner or outer surface of PropafilmTM FFC. The fast seal surface is indicated by a symbol on a label attached to each reel.

Treated Surface	Ordering Code	Label Symbol
Inside	I	Fast
Outside	0	Fast <<

Film Storage and Handling

The low heat-seal threshold and wide seal range of Propafilm™FFC film allows its use in particularly demanding packaging machine applications. Care should therefore be taken to protect reels of film from storage temperatures above 30°C (85°F) and localised sources of heat above 45°C (113°F). Reels of Propafilm™FFC should be protected from high levels of moisture and accidental water splashes at all times. The reels should remain in the protective coverings supplied until ready for use on converting or packaging machinery. Converted reels, in both master and slit reel form should be similarly protected at all times. Propafilm™ FFC is suitable for use for 6 months from the date of delivery and stocks should be used in rotation. Films should be allowed to reach operating room temperatures for 24 hours before use.

Food Contact

Propafilm™ FFC complies with the applicable EU and US legislation for most applications involving direct contact with foods. Full details are given on the Declaration of Compliance. Customers intending to use Propafilm™ FFC in a food contact application should request a copy of this document from Innovia Films. Details of compliance with food contact legislation in non-EU countries are also available upon request.
